

LONGHI

Rodica

X 125 M. Brunu

Structure in berglass, manually layered in two matching moulds, male and female. After being removed from the moulds, the two structures are processed and sealed together with metallic high resistance plaster. The external structure is finished in black or white Gelcoat, and for metallic colours it is manually painted and oven cured. Padding in cold-moulded high-density polyurethane foam and covered with Dacron. The armchair sets on a fixed base, the upper part of the chair swivels. This simple movement allows users to choose from a wide range of sitting positions, for maximum comfort. The leather and fabric upholstery is completely removable. External frame colours: Glossy white, Glossy black. Metallic finishes: bronze, grey, blue. Do not expose the product to weather conditions or atmospheric agents, nor to heat sources over 40°C. Also products for outdoor use could be affected by atmospheric agents.
