

Hocker

Jacques Herzog & Pierre de Meuron, 2005

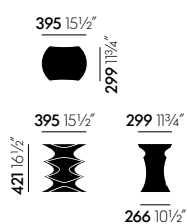

Hocker

With its intuitively clear shape, Hocker represents fundamental aspects of the conceptual approach practised by Herzog & de Meuron. The Hocker stool adds to a series of objects and installations created by the architects as independent projects alongside their architectural design work.

Materials

- **Material:** solid birch, white finish or stained dark brown.

DIMENSIONS (in accordance with EN 1335-1)
