

## Pil

Alessandro Busana

The main components of Pil are the backrest cushion and the seat cushion. The latter features a fold in the middle, created to generate an enveloping effect that physically and visually emphasises the feeling of softness. The base consists of metal legs, with the crossbars set at a special angle, to create an original graphic interweaving effect. Available in different versions: Pil, Pil up (higher backrest), Miss Pil (with armrests), Miss Pil up (with a higher backrest and armrests), Pil too (stool).
