W 523 Giuseppe Iasparra

A modular sofa that allows multiple furniture compositions. Characterised by backrest cushions that are adjustable in height by means of a mechanism that rotates smoothly through a 90° radius, making it possible to raise the cushion to the desired position. The backrest cushion mechanism is covered in medium-soft polyurethane foam, and is additionally covered with a soft sterilised goose down sheath. The backrest cushions are separable from the structure by means of practical bayonet joints, with the possibility of removing the cover. The outer structure is in wood covered in high-density polyurethane foam, and the leather or fabric upholstery is characterised by an elegant strip-quilted padding. The seat is made with a wooden base with non-deformable elastic straps, combined with a polyurethane foam mattress with various density levels. A rigid base layer maintains stability and prevents squashing, while at the centre of the seat, we find the “Breeze” insert, a revolutionary open-cell polyurethane foam, with a high level of resistance to ageing and deformation, which guarantees the dispersion of humidity, providing a feeling of the utmost well-being, and ensuring maximum comfort. Finally, a slab of Memory Foam, covered with an upholstery liner in joined resin, guarantees that the seat will return to its initial shape. Base upholstery is not removable. The feet, with an exclusive design in laser-treated metal, can be matched with the metal ring finishing the base, in the following finishes: - bright light gold, - matt Champagne gold, - bright chrome, - bright black chrome, - matt satin bronze, - bright pink gold, - matt pink gold.
